

PROFESSIONAL SUMMARY

Software Engineer with **4+ years** of experience **designing, developing, and supporting enterprise applications using Siemens Mendix** and modern **full-stack** technologies. Skilled in **application design, domain modeling, microflows, nanoflows, security, workflow automation, REST integrations, and production support**. Experienced in collaborating with **cross-functional teams** to deliver **scalable low-code solutions** across logistics, compliance, and transportation domains.

TECHNICAL SKILLS

Mendix Ecosystem: Mendix Studio Pro (v9/v10), Domain Modeling, Microflows, Nanoflows, Advanced XPath Security, Java Actions, Page Design, Integrations (REST, Teamcenter, SAP,etc).

Languages: Java, JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, React Native, Expo, Tailwind CSS, Redux Toolkit

Backend: Node.js, Express.js, MongoDB, REST APIs, GraphQL, JWT, OAuth

Tools & Other: Azure DevOps, CI/CD, Docker, Git, GitHub, Postman, Figma, Firebase, Appwrite.

PROFESSIONAL EXPERIENCE

Associate Consultant (Software Engineer – Mendix & Full-Stack)

Capgemini – Pune, India | Jul 2023 – Present

- Designed, developed, configured, and supported **enterprise-scale applications** using **Mendix and React**, supporting complex business workflows and compliance-driven systems, Support junior members.
- Built end-to-end **Mendix applications** including **domain models, microflows, nanoflows, integrations, and Mendix security**.
- Integrated external **REST APIs and backend** services into Mendix applications.

Projects

ShareSpace - Document Management System

- Architected from scratch** an enterprise-grade **document management platform** tailored for secure, file storage and business-unit collaboration.
- Engineered a hierarchical data structure** within the domain model to seamlessly organize complex directory trees and file systems.
- Implemented secure data lifecycle controls**, leveraging the FileDocument system to manage high-performance uploads/downloads alongside customized soft-delete (Trash) and permanent purge workflows.
- Enforced rigid security baselines** by building complex entity and attribute-level access criteria using XPath to strictly govern document visibility across user roles.
- Contributed actively to **refinement sessions and sprint planning**, collaborated with business stakeholders to gather and analyze business requirements.
- Integrated the application into **CI/CD pipelines**, enabling reliable builds and controlled deployments across environments.

Export Control

- Enhanced And Implemented an **Export Control Compliance system** in Mendix to automate regulatory validations.
- Refactored existing ECCN logic into a **configuration-driven design**, making **ECCNs and COO rules easy to understand, modify, and maintain**.
- Built dynamic validation microflows for export restrictions with **secure, auditable, and role-based access control**.

Resource & Industrials – Dangerous Goods Transport Management System (R&I DG TMS)

- developed a **customer-facing Mendix application** for booking dangerous goods transport slots.
- Implemented:
 - Time-slot booking & approval workflows
 - Role-based access for customers, schedulers, and admins
 - In-app and email notifications
 - Authentication and user management
- Built scalable **domain models, microflow-driven workflows**, and **secure entity access**.
- Delivered as a **Hackathon MVP in 1 day**, later expanded into a production-ready system with

Support & SPOC Role

- Acted as **technical SPOC** for multiple Mendix applications.
- Responsibilities included:
 - UI enhancements and design system rollout
 - Azure Active Directory & SSO integration
 - UAT support, post-production fixes, and hypercare
 - Continuously update technical documentation
- Resolved production issues and established best practices for Mendix development and support handover.

Software Developer (Backend & React)

BITCS | DigitalFlow | KnockOnce – Remote | Jun 2021 – Oct 2022

- Built **scalable full-stack features** using **Node.js, Express.js, and MongoDB**, handling complex CRUD operations and relational data modeling.
- Designed and consumed **RESTful APIs**, enabling seamless communication between frontend and backend services.
- Implemented **JWT-based authentication and authorization**, ensuring secure access control across applications.
- Developed **responsive React and Next.js components** from Figma designs using Tailwind CSS.
- Improved application performance through **API optimizations, efficient state management, and MongoDB indexing**.
- Ensured **cross-browser and mobile compatibility**, resolving UI/UX bottlenecks.

Other PROJECTS

Expense Tracker

- Built a React Native expense-sharing application with secure REST APIs, transaction-safe updates, and analytics dashboards.

Jira Clone

- Developed Kanban workflows, reusable UI components, and optimized data fetching using TanStack Query.

Real-Time Chat

- Implemented Socket.IO-based group messaging with real-time user presence.

CERTIFICATIONS

- Mendix Intermediate Certified
- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure AI Engineer Associate (AI-104)
- Microsoft GenAI Practitioner (AI-900)

EDUCATION

Bachelor of Engineering (B.E.) | Bharati Vidyapeeth College of Engineering, Pune

2019 – 2023
