

PROFESSIONAL SUMMARY

Mendix Developer with **2.5+ years of hands-on experience** and **4+ years of overall professional experience** building **enterprise-scale applications** across **logistics, compliance, and transport domains**. Strong expertise in **Mendix domain modeling, microflows, security, integrations, workflow automation, and UI/UX using Atlas Design System**, with a solid **full-stack foundation in JavaScript, REST APIs, and cloud platforms**. Proven ability to **own features end-to-end**, collaborate with global stakeholders, and **support production systems** in regulated enterprise environments, delivering scalable and maintainable solutions **across low-code and pro-code architectures**

TECHNICAL SKILLS

Languages: Java , JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, React Native, Expo, Tailwind CSS, Redux Toolkit

Backend: Node.js, Express.js, MongoDB, REST APIs, GraphQL, JWT, OAuth

Tools & Other: Mendix, Azure DevOps, CI/CD, Docker, Git, GitHub, Postman, Figma, Firebase, Appwrite.

PROFESSIONAL EXPERIENCE

Associate Consultant (Software Engineer – Mendix & Full-Stack)

Capgemini – Pune, India | Jul 2023 – Present

- Designed and delivered **enterprise-scale applications** using **Mendix and React**, supporting complex business workflows and compliance-driven systems
- Built end-to-end **Mendix applications** including **domain models, microflows, nanoflows, integrations, and Mendix security**.
- Integrated external **REST APIs and backend** services into Mendix applications.

Projects

ShareSpace - Document Management System

- Developed ShareSpace, a Mendix-based enterprise **document management system** for secure file storage and collaboration from scratch.
- Implemented **a hierarchical folder and file structure** to organize documents across business units.
- Built secure file **upload and download functionality** using Mendix FileDocument with **role-based access** control.
- Implemented **Soft Delete (Trash)** functionality to support **restore and permanent delete**, ensuring an audit-friendly document lifecycle.
- Applied entity and attribute-level **security with XPath** to control document **visibility and access**.
- Contributed actively to **refinement sessions and sprint planning**, collaborating with business and technical stakeholders.
- Integrated the application into **CI/CD pipelines**, enabling reliable builds and controlled deployments across environments.

Export Control

- Enhanced And Implemented an **Export Control Compliance system** in Mendix to automate regulatory validations.
- Refactored existing ECCN logic into a **configuration-driven design**, making **ECCNs and COO rules easy to understand, modify, and maintain**.
- Built dynamic validation microflows for export restrictions with **secure, auditable, and role-based access control**.

Resource & Industrials – Dangerous Goods Transport Management System (R&I DG TMS)

- developed a **customer-facing Mendix application** for booking dangerous goods transport slots.
- Implemented:
 - Time-slot booking & approval workflows
 - Role-based access for customers, schedulers, and admins
 - In-app and email notifications
 - Authentication and user management
- Built scalable **domain models, microflow-driven workflows**, and **secure entity access**.
- Delivered as a **Hackathon MVP in 1 day**, later expanded into a production-ready system with

Support & SPOC Role

- Acted as **technical SPOC** for multiple Mendix applications.
- Responsibilities included:
 - UI enhancements and design system rollout
 - Azure Active Directory & SSO integration
 - UAT support, post-production fixes, and hypercare
- Resolved production issues and established best practices for Mendix development and support handover.

Software Developer (Backend & React)

BITCS | DigitalFlow | KnockOnce – Remote | Jun 2021 – Oct 2022

- Built **scalable full-stack features** using **Node.js, Express.js, and MongoDB**, handling complex CRUD operations and relational data modeling.
- Designed and consumed **RESTful APIs**, enabling seamless communication between frontend and backend services.
- Implemented **JWT-based authentication and authorization**, ensuring secure access control across applications.
- Developed **responsive React and Next.js components** from Figma designs using Tailwind CSS.
- Improved application performance through **API optimizations, efficient state management, and MongoDB indexing**.
- Ensured **cross-browser and mobile compatibility**, resolving UI/UX bottlenecks.

Other PROJECTS

Expense Tracker (Mobile Application)

React Native, Node.js, Express, MongoDB

- Designed a shared-expense system with **REST APIs and real-time balance calculation**.
- Implemented **transaction-safe updates** to ensure data consistency across users and groups.
- Built analytics dashboards using aggregated expense data for spending insights.
- Modeled normalized schemas for users, groups, expenses, and balances.

Jira Clone (Project Management Tool)

Next.js, Appwrite, TanStack Query, ShadCN

- Implemented task workflows, project boards, and real-time updates.
- Designed modular UI components and optimized data fetching with caching strategies.

Real-Time Chat Application

- Built group chat functionality with join/leave support using **Socket.IO**.
- Handled real-time message delivery and user presence updates.

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate (AZ-204)**
- Microsoft Certified: Azure AI Engineer Associate (AI-104)**
- Microsoft GenAI Practitioner (AI-900)**

EDUCATION

Bachelor of Engineering (B.E.) | Bharati Vidyapeeth College of Engineering, Pune
2019 – 2023
